FINAL DRIVE YOUTH CONFERENCE

Three organizers now in the field. At least thirty delegates will be present. The struggle against rotten conditions of youth and danger of new war will be center point of discussion.

BELLAIRE, Ohio.—Three organizers of the Young Workers' (Communist) League are now in the Eastern Ohio coal mining field in the final drive of intensive concentration upon this area for the Young Workers' Conference which is to take place in Bellaire on February 28. Harvey Murphy, who has been in the field for a couple of weeks, now reports that at least thirty delegates will be present at the conference. Joe Kobyak, known in the field for his work in Dillonvale, and August Martine, who has recently returned from the anthracite strike and is also working for the conference.

Young Workers Rally to the Conference

BELLAIRE, Ohio.—One of the signs of a spirited revival of the labor movement of Eastern Ohio, following upon long months of depression and hopelessness, is the readiness of the young workers of the entire section to respond to the call which was issued some time ago by the Young Workers arrangements committee for a conference of the young workers of the region.

The organizers of the conference already report that despite difficulties to be encountered in this section of the country, there will be delegates from the coal mines of Powhatan Point, Fortville, Noffs, the famous Webb site of Shadyside, which has been the scene of terrible disaster to the miners, the Imperial Glass plant in Bellaire which has experienced a strike of young miners, a local union of the United Mine Workers of America, which is sending three delegates, one of whom is a young Negro, and a number of other mines and factories.

The bad conditions of the young miners and other young workers in particular accounts for the fitness with which they are responding to the call for the conference, despite the fact that there had not been any elaborate preparations for the meeting.

For weeks, the young workers of the Imperial Glass works of Bellaire have been out on strike, not only because of the brutal corruption of the officials and the police, but most of them have been back to work, and the miners who remained out were

blacklisted. The brave fight that they put up during the time they were out, in the face of the great obstacles that stood in their way, is a tribute to the fighting spirit of the young workers there. They have learned the lesson of organization and will be represented at the conference on the 28th.

In the Webb mine at Shadyside, the workers have learned some bitter lessons from capitalist society. When the Webb mine explosion took place they also learned about the "risks of industry" which the capitalist is supposed to take and which the worker alone actually takes.

From Wheeling, the center of "Little Siberia," as West Virginia is known to the workers, there will be representatives of the young workers employed in the can company, a breach in the armor of the bosses which promises much for the future.

From every other important town in the field there will be representatives. The desperate situation of the working class youth there will be considered and a well-thought out plan of action will be adopted at the conference to serve as a guide to action for the fight against the problems that face the young workers.

The success of this conference will be a signal for the repetition of this work in every field of any importance in the country. Young Workers! Rally to the conference! Besides sending your delegates, come to the conference in mass.

Watch the Daily Worker for announcement of the date in which the conference will be held.

YOUNG ANTHRACITE MINERS! LEWIS HAS BETRAYED YOU!

Not Only Did You Not Get Your Demands, but Lewis Tied Your Hands With a Five-Year Agreement. Rally to Repudiate the "Black Friday" Agreement.

TRI-DISTRICT CONVENTION PACKED BY LEWIS HENCHMEN

SCRANTON, Pa.—The longest anthracite strike in the history of coal mining in this country has been concluded. John L. Lewis, labor leader par excellence has not betrayed the thousands of young and adult miners. The "Black Friday" surrender of the Lewis regime to the coal operators will go down in history as the most scoundrelous ever perpetrated against the workers of a basic industry.

The hastily called Scranton tri-district convention which was to discuss the merits or demerits of the Pittsburgh five year agreement was the saddest joke of the entire situation. Lewis and his henchmen saw to it that there could be no rank and file representation in this convention. The trick was to cut down representation so that instead of one delegate to each 100 members the delegation was one to each 500. The hand-picked credentials committee of the Lewis gangsters then cleared the dirty work.

Sam and the militant Ed, leaders of miner's local No. 1104 squeezed thru to election. When he endeavored to speak the floor and discuss the convention, a hastily convened committee of the vice and gang of cut-throat miners who had been in the ousting of the miners' local No. 1104

sharpened their sticks and threatened to break the skull of any who tried to speak. The rest of the convention was taken up with the passing and repassing of compliments between the "official gang."

The Young Workers (Communist) League in the early period of the strike called upon the young miners to take the most militant stand in the struggle. The manifesto of the League:

"Young miners! You will be the hardest hit if the strike is not won! Get into the front ranks with the strikers! Give the strike a militant character! Make sure that you get your share of the victory and that your gang of cut-throat miners are defeated in the ousting of the miners' local No. 1104

sharpened their sticks and threatened to break the skull of any who tried to speak. The rest of the convention was taken up with the passing and repassing of compliments between the "official gang."

Will you stand for this sell-out? Or will you repudiate the "Black Friday" sell out and the methods used to pack the tri-district convention? The United

Miners of America will not win its battles as long as the rank and file allow Lewis to continue as the leader of the union. The demand of the moment is the unity of the young and adult miners behind the progressive miners committee in the struggle against the Lewis betrayal.

Young miners! You will be the hardest hit if the strike is not won! Get into the front ranks with the strikers! Give the strike a militant character! Make sure that you get your share of the victory and that your gang of cut-throat miners are defeated in the ousting of the miners' local No. 1104

HART, SCHAFFNER & MARX SUPPOSED TO BE UNION SHOP ACCORDING TO HILLMAN-COMPANY DEAL

Mr. Hillman Will Have to Answer Why the "Inspector" Girls Can Remain Outside the Union in a Shop Which is Supposedly Union

By Young Worker Correspondent.

CHICAGO, Ill.—I work for Hart, Schaffner and Marx Clothing factory for the last eight years. I am going to tell you about the evolution of a section of workers that I think will be of great interest to the readers of the Young Workers.

These particular workers are called the factory "inspectors." I'll just tell you of the kind of work they are doing. These inspectors (they are all girls) have got to cut off all the ends of the coats. Second, she has to sew up all the rips that the coat might happen to have. (This happens to be on every coat).

Yes, something important, these tailor girls are nonunion. In order to blind the eyes of the union tailors the union officials got an agreement with Hart, Schaffner and Marx saying that the "inspectors" can only sew up a hole, smaller than three inches. They said nothing against the method of sewing up eight or ten holes and every worker knows that ten times 3 makes 30. Hillman also knew that a few years ago the inspectors were all union workers. Now he allows them to remain outside the union and work in a so-called union shop.

That is the evolution that I am talking about. Five years ago an inspector was a union worker, today, they are outlaws. Five years ago the "inspectors" received \$38 for their hard work. Today the girls receive from \$17 to \$20 for the same work. Five years ago an "inspector" had to examine from 50 to 60 coats a day. Today, thru the speed up method, the "inspector" examines 130 coats a day.

What a difference in production and in wages? The conditions of these workers evolved backwards. It just shows the backwards evolution of Hillman also. Yes, this infamous labor faker, the president of the Amalgamated Clothing Workers of America, surely adopted the methods of all the "fat boys" from Greenup down, to sell out the workers to the profit of greedy capitalists.

A question brother Hillman? If the inspectors don't need to be organized, why do you keep the bushwhackers, the finishers, the cleaners and all the rest of the sections in the union? The cleaners don't use a needle at all. They should also be outlawed according to your conception of organization. But your conception is the bunk.

The inspectors should not wait for the mercy of the bosses or Hillman. They are both your enemies. The only way to better your conditions is to form committees and to demand that you be taken into the union with full rights. That will be the first step in organizing for the fight for the abolition of the speed up system and for a \$38 week.

OSCAR-HEINEMANN YOUTH RESPOND TO LEAGUE MESSAGE

By Young Worker Correspondent

CHICAGO, Ill.—Altho the Young Workers' League has but recently been brought before the workers of the Oscar Heinemann Silk Corp., they are showing a great deal of interest in it. Issues of the Young Worker and a shop bulletin have been distributed and well received. The shop bulletin contained the following demands which are being put forward by the nucleus:

1. An 8 instead of an 8½ hour day.

2. An hour instead of ½ hour for lunch.

3. Equal help for the helpers who work as hard as the spinners.

Many of the Young Workers expressed their approval of these demands, when they read their copy of the bulletin. It is worthy to mention that while hundred of the bulletin were distributed, not a single one was thrown away. The bulletin has given rise to a great deal of discussion inside of the shop.

With the wages at the Oscar Heinemann Corp. averaging from \$16 to \$22 (and on a piece work basis at that) the young workers certainly have a right to expect and demand raises. They are beginning to wake up to the fact that it is because of the low pay that they are receiving that the company is able to pile up millions of dollars profit each year.

The Young Workers' League

HART, SCHAFFNER FLOOR BOYS AND SHIP CLERKS DEMAND UNIONIZATION

By Young Worker Correspondent

CHICAGO, Ill.—In order to show you the injustice of the clothing concerns in Chicago I will endeavor to describe some of the conditions which prevail in Hart, Schaffner and Marx. You will realize that work there is not so pleasant. The officials of this concern do not pay good wages. They usually pay \$17 per week. This may seem a large sum of money to some of the fellows who are working for \$12 to \$15, but you must realize that this is by no means enough money to live on. The shop is closed on Saturday and the boss deducts a couple of dollars from your pay every week. We get no vacation no matter how many years we work there.

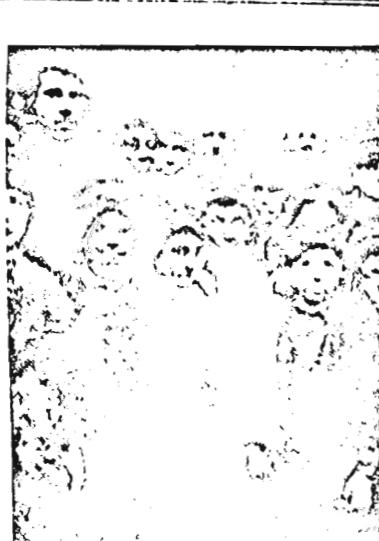

Can't Get Raise.

You can work for years in this concern, and yet when you ask the boss for a raise he looks at you as though you are crazy. If you come a few minutes late you get docked. If you displease the foreman you get fired. The reason they can do this is because we are not organized. All the other workers in the shop are organized, why shouldn't the floor boys, the shipping clerks and the inspectors be organized.

But you should not think that the reasons I already gave are enough. I will tell you a little more about the shop I work in. The bosses used to have more than twice as many floor boys working, but now they make every one of us do the work of two men, and make us carry bundles that we can hardly lift. Besides this they make us run errands and do many things we do not like. They speed you up and make you finish your work as soon as they could. Then they send us home and dock our pay. One fellow the other day was sent home 15 minutes before closing time and they docked him.

Floor Boys, Inspectors, Shipping Clerks.

Look at the cutters, the operators, the pressers and the other workers in the shop. They are organized. They have good pay and good working conditions. We ought to organize, too. Let all of us floor boys, inspectors and shipping clerks get together and fight for admission into the union as a body. Let us ask the organized workers in the shop to help us. I am sure they will.

YOUNG MINERS BETRAYED BY LEWIS!

nucleus in the Oscar-Heinemann Silk corporation plans to carry on its work systematically until it brings the message and program of the league before every young worker in the factory, and until it includes every class conscious and militant young worker within its ranks.

Life of Young Workers

Salemen Exploited in Frank & Sedors

By Young Worker Correspondent

PITTSBURGH, Pa.—When we talk of being exploited we do not mean sales girls only, but salesmen as well. In Frank and Sedors department store where I happen to be working as a sales girl there is a Shoe Department where salesmen are mainly employed.

In this department the regular working hours are only from 8:20 in the morning till 8 or 9 in the evening. And when there is a special sale the young fellow workers are forced to work till midnight. For their extra hours they are being given 50 cents for supper in place of pay for overtime. The reason the young exploiters do not keep their slaves till midnight every day is they themselves have to take out some of the poor working girls for a "good time."

Now, these salesmen get only from \$10 to \$18 per week. The place is filthy, without air. The lights are so bright that your eyes hurt in a very short time. But this is not all, as the following lines will show.

The other day one of the fellows committed a "crime." He came in a little late because the train was delayed for one reason or another. The boss told him to "go home for the day." This poor fellow took the boss seriously and next day came ready for work. But he was told by the boss to go home for good as he was not needed any longer.

How many of the other employees of this large department store gave this little incident any consideration? How many of them realize that what happened to this fellow worker today may happen to them tomorrow?

CAMPAIGN TO ORGANIZE THE UNORGANIZED MILLINERY WORKERS EFFECTS MASSES OF YOUNG MILLINERS

By Young Worker Correspondent

CHICAGO, Ill.—Thousands of workers are engaged in the millinery industry. The young workers engaged in this industry make up nearly half the total number employed. A campaign has now been started to organize the unorganized, young as well as adult workers in this industry. A question of vital importance is: what will the attitude of the young workers be towards this organization campaign? The young millinery workers should realize that irrespective of what the conditions are in the factory where they work, that on the average their situation is worse than the adult workers. During the busy time the young worker makes less than the adult worker, while in the slack time we are thrown out of work entirely.

Unionization Question for Youth

The question of unionization is a more burning question for the young millinery workers than the adults. Therefore, we young workers cannot neglect this present organization campaign. We should so fight that this organization campaign, long as it may last, must be the final one, and result in the complete unionization of this industry.

The thought of how much there is to be gained from unionization will broaden the interest of every young worker.

They will see in this campaign a means for the betterment of their own conditions, and thus do everything in their power to help it along. The young workers will be drawn into the work

with all their life and energy.

We Want Better Conditions!

We all want better conditions; higher wages, less hours, and a secure job, but we must come to the conclusion that unless we fight for it, we will never get it. With this understanding we will come nearer to the solution of our trade problems. The young workers of Russia work from 4 to six hours a day with full pay. Nobody handed them these conditions on a silver platter. They won them because they fought hand in hand with the adult workers for a better life. We the young millinery workers of this country, can learn many lessons from our Russian comrades. We can learn to fully assist our adult brothers and sisters in their struggles.

Millinery Struggle is on.

The millinery struggle is on now. The youth as well as the adult workers are determined to win it. Only then will the victory be on the workers' side. The young millinery workers should not feel isolated in this struggle.

Support of Young Communists.

The Young Workers (Communist) League of America, the organization of the young workers of this country, strives to lead the working youth in their struggles, stands solidly behind the young millinery workers in their present unionization drive.

The Young Workers (Communist) League calls upon all the young millinery workers to line up in the union of their trade and to do everything in their power to help the present unionization drive.

Bishop Candy Factory Invaded in Rain

By Young Worker Correspondent

ON Tuesday, February 2, a group of Young Workers (Communist) League members appeared in front of Bishop's Candy Factory. This ferocious-looking bunch, no doubt, had sinister plans—to bomb the factory, perhaps. Who knows what these terrible Bolsheviks will do? Soon their plans were revealed thru their deeds. This consisted of distributing leaflets and Young Workers to the youthful wage-slaves employed by the millionaire confectioner, the Hon. Mr. Bishop.

It began to rain. The whistle blew—the signal that the slaves may stop working for a few hours, go home, eat supper, and renew their energy for tomorrow's work. Young boys and girls came out, rushing for the packed street cars. Halt! His majesty Mr. Bishop himself came out. Don't get excited. He didn't break his neck to get a street car. He stepped up to a Pierce-Arrow limousine, the door of which was opened by a Negro chauffeur, and rode on leisurely.

The wage-slaves, who make it possible for Mr. Bishop to ride around in limousines, continued to rush for crowded street cars. The rain came down harder. The Y. W. L. members, however, were not daunted. The harder it rained, the more literature we distributed. What does a little rain matter in our efforts to awaken the young toilers. Nothing can stop us! The young workers must soon be awakened, and we, the Communist youth must be the ones to awaken them.—Giselle Kositzka.

It is for his profit, I think that is true. Since the recent layoff, there are about 100 workers less working in the shop. Still the superintendent and the foreman demand from us the same amount of work. They are always telling us we are behind in our work.

The bindery used to be busy and noisy. All the machines were running. The foremen were busy running from table to table and did not have as much time to holler as they do now. Now the machinery is quiet. We are bunched in corner, working harder than before. The foreman has

BOSSES' PROPAGANDA ANSWERS YOUNG MILL WORKER

"If Blood-Sucker Johnson Fights the Communists, Then I C
There is Nothing Wrong With the Communists!"

By a Young Striker.

PASSAIC, N. J.—The capitalist newspapers of this burg carry a whole lot of the mill owners' propaganda. Particularly the propaganda of Col. Johnson and the owners of the F. & H. Mill. They shout about "outside agitators," "irresponsible people" and Bolshevism. Now and then the newspapers print the bogey stories about Albert Weisbord being called by the "respectable" (100 per cent—the greatest flag waver of them all) Col. Johnson all kinds of names. Very often they refer to Weisbord as "the outside agitator."

Show up Johnson Bunk.

Now let us see who is an outsider and who is the irresponsible person. Weisbord may be the agitator for the interests of the strikers and their wives and children, but who is this loud mouthed Johnson? He is the agitator for the bosses' crew. He is trying to convince us that it is to our benefit to accept wage cuts. The bosses do not work in the mills. They do not produce anything. All they do is to make us work for them and then get large profits from our labors.

The Useless Fat Boys.

They are the useless people. A bunch of bloody parasites. They fatten themselves on the blood and sweat of the workers. Like a burdensome pack of vampires they sit on the backs of the workers and suck every bit of energy and vitality out of the bodies of the workers and convert it into yellow gold. But the workers of the mills are awakened and are going to fight every inch of the ground until we achieve our victory. The day when we shall overthrow the yoke of the Johnsons and Co. Then these fat boys will also have to do their work beside us on the bench or at the loom.

We Stand by Our Strikers.

As to Albert Weisbord, he is the last one to be called an outsider. He is the best fighter among us. He knows how to stick up for our rights and he fights

bravely. On the other hand about the bloody suckers who support the bosses. The bosses, hands down wage cuts, cut our hours, make us work harder and harder. What do? When we protest these rotten conditions and in a peaceful demonstration send the police to beat us. They hate Weisbord, because this strike he is the fighting man of the strikers and a leader of the working class.

This Responsibility is Ours.

Then the bosses speak about responsibility. Who in the g

can be compared to Johnson's crew in lack of responsibility?

Lack of responsibility is a term to characterize Mr. Johnson. He is a first degree criminal, as far as the workers concerned.

The whole idea that he represents are a bunch of parasites, horse thieves, gamblers and bootleggers.

Johnson and his crew are responsible for the children and workers dying for want of food.

The bosses are responsible taking young children from schools and putting them in the mills. They are responsible for poor housing conditions, for clothing, and general rotten conditions. It is thanks to the fighting efforts of workers like Weisbord that the mill workers now fighting for better conditions.

The Bolsheviks Decay.

Now about the bogey of Bolshevism. Johnson thinks he has made a wise crack. He has that he is going to scare the workers into fighting by telling them that Weisbord is a Communist. Now the workers see that Weisbord fights with them. He would just like to say that a man like Weisbord is a Communist and a dirty blood sucker. Johnson fights him and the Communists, then I guess there is nothing wrong with the Communists and I better join them. He knows how to stick up for our rights and he fights

Passaic Daily News Incites Police Acts Then Plays Innocent

PASSAIC, N. J.—After the victorious march of the textile strikers of Passaic and vicinity into the city of Clifton, where the police did not offer any violent resistance as they did on Tuesday, Feb. 8, the Passaic Daily News came out and claimed that he reason the police were forced to abandon their gorilla methods in treating the strikers, was because of an editorial that appeared in the Passaic Daily News on Wednesday, Feb. 10, the day after the attack upon the strikers, criticizing the activities of the police.

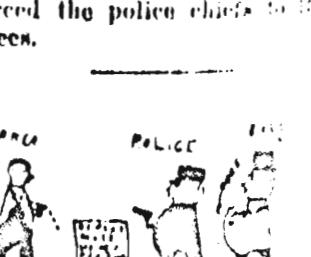

Such hypocrisy cannot but raise the indignation of the workers against the supporters of the bosses. The Passaic Daily News as well as any other tool of the bosses is guilty and responsible for the brutal onslaught upon the strikers. If the Passaic Daily News would have the welfare and justice to the strikers close to its heart then the Passaic Daily News would have used its influence and authority to induce the three police commissioners of Passaic, Garfield and Clifton not to compromise against the strikers.

Because the Passaic Daily News connected with local administration was informed and knew of the conference by the three police commissioners of Passaic, Garfield and Clifton where they arrived at an agreement that in order to successfully combat the strikers they must concentrate and combine the police forces of all the three towns and launch a vigorous attack.

The Passaic Daily News is quite aware of the peaceful and intentions of the strikers that the leaders were far from inciting the strikers to violence. It was then the duty of the Passaic Daily News to warn the city authorities that such measures as mobilizing the Passaic, Garfield and Clifton police in order to protect the mill owners by preventing the strikers from picketing were unwarranted and furthermore to use the police to slug and beat the heads of the strikers.

If the Passaic Daily News sincere in its protests against the ferocious action of the Passaic strikers, then the yellow sheet would have protested long before this day took place and not the day after. But the reason the yellow sheet did criticize on the day after the savage attack of the police was because the attack of the police brought forth a widespread protest of the workers in the city and it increased the popular sympathy for the strikers, and this is a good method of gaining support. But the yellow sheet will be disappointed due to the fact that there are very few simple minded workers nowaday.

Passaic and the workers say that it was the organized and militant of the Passaic workers that forced the police chiefs to their knees.

Support the Passaic Strikers!

LOS ANGELES YOUNG COMMUNISTS ASK YIPSELS FOR UNITED FRONT

Issue Fighting R. O. T. C. in High School

YOUNG SOCIALISTS TALK OF "JUST" AMERICA

LOS ANGELES, Cal.—The moral bankruptcy of the Socialist Party is revealed, in all its nakedness, in its offspring—the young People's Socialist League. The following incident, early and undeniably illustrates the degeneracy of the Socialist movement.

A committee from the Young Workers' (Communist) League was sent to the Yipseis, on Thursday, Jan. 28, with the proposal that a united front be formed for the purpose of fighting the R. O. T. C. in a certain high school, which a great number of Yipseis attend. The Y. W. L. delegate was given the floor, and pointed out the real purpose of the R. O. T. C., which is to manufacture soldiers for the impending wars. She explained how war is merely an expression of economic facts between capitalists of different nations; that a new war is threatening, and that the south is being prepared, morally and physically, to participate in the militaristic maneuvers of the capitalists. She showed that no workers gain nothing, and lose everything from war, and therefore, called upon the Yipseis to join with the Y. W. L. and fight militarism.

What was the response of the enlightened Socialist youth, the dedicated champions of a new social order? There were varying opinions as to the advisability of entering upon such activity. A few were in favor of it, but even these were half-hearted. They contended that such a tactic is too small for them; they need something of a greater magnitude. Well do they understand the Leninist principle of mass penetration.

Our "Just" America? Other youthful representatives of the Socialist movement announced an attack against militarism as an attack against just America. One said (this actually happened, it is not a dream of the imagination) that "America is a righteous one," and when she enters a war, she is morally justified. Therefore, we should be in fa-

A MATERIAL CONTRIBUTION TO DISCUSSION ON YOUNG WORKER

By RUFUS P. HEATH
Young Worker Correspondent
To resume the Young Worker from its present state of financial decline, I, the undersigned member of the Young Workers' Communist League of America, hereby pledge to donate to the national office of the aforementioned organization, Ten Per Cent (10%) of the total amount of my earnings for a period of six months (or actual working time, to time that I am unemployed or to count). Which amount will go for a double purpose, viz., to the Young Worker in part payment of its (the Young Worker) debt to The Daily Worker.

Of course, I fully realize that the member or a small group of members, adopting this pledge, could do little or no good on the one hand, while on the other, should a majority of the League leadership adopt it, the Young Worker debt to the Daily Worker could be settled in full in a reasonable length of time, and The Young Worker could again thrive.

U. M. W. LOCAL UNION ELECTS DELEGATES TO E. OHIO YOUNG WORKERS' CONFERENCE

AVELLA, Pa.—A definite sign of the forward swing of the East Ohio Young Workers' conference. Ten delegates were elected from Local Union No. 2881, United Mine Workers of America to attend the Young Workers' conference.

George Papen spoke on the necessity of the Young Workers' conference. The delegates represent about 300 or 400 miners of which 200 are young miners. The purpose of this local union was fully agreed.

Local unions will endorse the E. Ohio Young Workers' conference soon. After the confer-

SEVENTH CONGRESS, RUSSIAN LENINIST YOUNG COMMUNIST LEAGUE. GREETINGS!

The American Young Communist League, looks to the Russian Leninist Young Communist League, on the occasion of its seventh congress and finds it immeasurably stronger than ever before. The growth of the league gives us the greatest proof of the increasing firmness and strength of the First Workers' Republic.

In imperialist America, where the capitalist class lays hitherto unheard of levies upon the workers of America and the workers of the world, we look to your work and take courage and example from it. The workers in our country are learning their lessons from our Russian comrades and are helping to build the American revolutionary movement as a result of it.

We feel confident that under the leadership and with the guidance of the Young Communist International, the seventh congress will take the right road towards the building of a Communist Society in the Union of Socialist Soviet Republic and the accomplishment of the World Revolution.

We pledge undying support in this work. May your example take root in the heart of every worker in the world!

Long live the Russian Leninist Young Communist League!

Long live the Young Communist International!

Young Worker (Communist) League of America.

PROBLEMS IN SHOP NUCLEI WORK

By SAM DARCY.

No. 1.—Shop Bulletins and Their Distribution

FROM the bulletins received at the National Office one becomes convinced that the title for this discussion should be "What Shop Bulletins Should Not Contain."

In some bulletins there is the danger of the use of phrases which are peculiar to our internal discussion and which the average young worker does not understand. Then the bulletins are generally too "dry." There should be popular poems. Not the free verse or the highly technical poetry but what are known as "ditties." On the occasion of an order to work overtime next Monday night which the workers represented one bulletin contained the following which is good:

There are very few workers with brain so dead
Who never to themselves have said
"I'd a hell of a lot rather go to bed
Than to work on the night of Monday.
And there are plenty of bosses with
soul so small
Who saw to the worker "You've
got a gall."
Not to be working away at all
On so lovely a day as Sunday."
It might also contain jokes of such a character as to deliver a message. For example:

Sign of Lunacy.

A visitor to an insane asylum saw a guard in charge of about a hundred inmates who were out for exercise. The visitor, inquired of the guard if he was not afraid of being attacked by one of the lunatics. "No; I can lick any of them," the guard answered.

"Yes, but suppose they all attacked you?"

"No chance of that," said the guard. "Crazy people never organize."

In addition to these it should also contain many very short items about the conditions in the shop, a few on the Y. W. C. L., and occasionally one on some concrete current political problem.

every time the opportunity pre-

I further request that this pledge be published in the next issue of The Young Worker and that all members who possibly can afford to adopt it. It is a case of life and death with our press. The Young Worker.

Some of our members who are working in the national office, at the present time, are only getting half pay. So I believe that they should automatically be exempt, to donate what they can spare.

I suggest that this pledge be taken up at all League meetings and be discussed, acted upon and passed as often as possible.

E. OHIO YOUTH CONFERENCE BENEFIT AFFAIR. ATTEND!

CLEVELAND, Ohio—A benefit party and entertainment is being given by the Jewish Branch of the Young Workers' (Communist) League for the benefit of the East Ohio Youth Conference.

The Party will be given at 5311 Woodland Ave., on Sunday, Feb. 21, at 5 P. M. Admission will be free.

For the Recognition of the Soviet Union!

Unite For Protection of Foreign Born Workers!

ence Local 2881 plans to hold a mass meeting which will hear the reports of the conference delegates. Among the delegates there will be one Negro miner.

BOY SCOUT ANNIVERSARY OCCASION FOR FASCIST AND STRIKEBREAKER TALKS

Religious Dope Helps to Make Scouts Tools of Bosses

MINNEAPOLIS, Minn.—All the forces at the disposal of the chamber of commerce was used to make the local Boy Scout celebration here a success. Churches, Kiwanis Club, Rotary Club, Business Men's Club all combined to give the young "aristocrats" organized into the Boy Scouts an impression that they are contributing something useful to society. The occasion celebrated was the Sixteenth Anniversary of the National Organization of Boy Scouts. All scouts were invited to the Church of the Redeemer last night where scout officials and Reverend E. C. Reaman preached sermons on the mission of the Boy Scouts. This mission it appears, is to learn the "christian" ethics of the ruling class, to carry out the latter's instructions without question as to their motives and to be ready at all times to give one's self in the defense of "our" country and of "our" interests abroad.

Other imperialist designs of the bosses were revealed. In case of war, the Boy Scouts would fit well into the military scheme. They already have, the discipline, training and military prejudices necessary to play leading roles in our "glorious" army. In times of peace, the speaker said, they must take the initiative in maintaining "industrial peace"—which consists in becoming strikebreakers ("replacement men") when necessary. Besides this they must "keep order" in workers' assemblies, and perform other fascist functions.

On Friday the 12th, the scouts were addressed at the First Baptist (Rockefeller's) Church by Governor Theodore Christian. The governor also

placed a wreath at the Gateway

Memorial as an expression of "sympathy" for Minneapolis workers killed in the war.

St. Paul Boy Scouts also were given propaganda this week at the Faith Lutheran Church. Rev. L. Grant told the scouts that the scout oath is "another wording of the Ten Commandments" and that these are the "foundations of our society."

The five local radio stations presented hours of "Boy Scout" programs today. By remote control from WEAF New York, WCCO broadcasted speeches by Dan Beard, Baden Powell and other national agents of Big Business.

Most Twin City young workers know that the Boy Scouts is an organization for the rich. Still by means of powerful propaganda the capitalists are able to enlist numbers of working class youth into their ranks.

The Twin City Leagues will use every means to make clear the capitalist militaristic designs of this organization and will fight to bring the young workers into the organization of their class, the Young Workers' (Communist) League.

(By Young Worker Correspondent)

NEW YORK CITY.—There is a Peerless Sample Card Co. in New York City and many a young girl is working in that factory. The wages are quiet low and the work quiet hard. Well, one day

when the girls came to work there was no heat and water. It was so cold that one girl even cried and naturally the girls kicked.

But there is a boss and a man in the back and they had to work. Many a girl felt like hitting the bosses' nose, but they were helpless, said: "Oh, if I could only get married!"

A quarter of an hour before lunch the boss said, "Girls, I am giving you an extra quarter of an hour to warm up, like Charleston." The frozen girls in the Charleston and then went to work again all freezing, thirsty. A few days later it was cold again. One girl complained about it to the foreman.

The boss happened to be blind. Send her home, if she does not like it here. This was much already and all the girls protested and the girl did not go home. Well, this is a fine sample girl, if you stick to the boss can't ride over her back so easily. Remember, lesson and always stick together with your fellow workers.

OF GREAT SIGNIFICANCE!

This Issue Is in Larger Type!

WHY?

Because It Costs More to Print It in Small Type and We Haven't Able to Raise the Funds!

This is the second retreat we have had to make in four months.

We may have to make a third one and make the YOUNG WORKER a monthly!

Unless We Get Help

You!

Young Miners
Young Textile Workers
Young Garment Workers

and YOU young workers in about

hundred shops who have used this paper in your fight against your bosses.

Are You Loyal Enough To Your Paper to Help It Financially?

It needs your help both in getting subscribers and in finances!

Below are two blanks. Fill at least one of them out. Maybe both.

PASCAIC STRIKE

THE militancy in the strike of the more than 10,000 textile workers of Passaic, New Jersey, and vicinity is growing daily. No little part of the credit for this is due to the many thousands of young workers between 14 and 20 years of age who are in the forefront of this strike movement. The strike committee is doing all in its power to help the young workers take a leading part in the strike movement. For this purpose a special mass meeting of young strikers has been scheduled.

When the strikers endeavored to picket the plants in Clifton the heavy hand of the local governmental machine descended on them. Many men, women and young girl strikers were badly beaten by the clubs of the police. The role of the government as the armed fist of the ruling, boss class was shown in all its hideousness to the Passaic strikers. The lesson of struggling jointly against the bosses and their tool—the government was clearly driven home to those strikers.

Instead of resulting in a set back the dastardly attack of the police resulted in more firmly knitting together the strikers in their struggle. Not only did they stand up solidly for their old demands, but presented many new ones which grew out of the struggle.

Today the big question which will assure the success of the strike, is the question of relief. From the first day of the strike, the strike committee realized that this was a burning question. The movement for the unity of all workers' organizations for the relief of the strikers was set into motion. A good start has been made but it is not enough. In struggling against the 10-hour day, wage cuts, the speed up system and for the right to organize, the Passaic strikers are fighting the battles of the entire American working class. If the Passaic strikers win their heroic battle, the bosses of the other industries will hesitate in their offensive against the standard of living of the working class. Hence, all militant young workers will not hesitate to immediately take up the question of relief in their unions and other organizations.

As to the bosses' propaganda in the kept press, about "outside agitators and Communists" all we can do is answer in the words of a young textile striker: If John brought the Communists, then there must be something good about the Communists and I ought to join them and learn how to fight them effectively."

EAST OHIO YOUNG WORKERS' CONFERENCE

THE final drive for the East Ohio Young Workers Conference scheduled for Bellaire, Ohio, on Feb. 28th, is now under way. There are three organizers in the field who are energetically undertaking the best minute organization work. From all estimates there will be present at least 30 bonafide delegates.

The later results of the conference organization efforts are really heartening. The lack of finances threatened to give a set back to the work undertaken in the beginning. But with the renewed energy of the League members entrusted with this work and the non-party youth who were co-operating so well a definite upward sweep was noted.

It is significant that among the delegates there will be three representing local of the U. M. W. A. from Avella, Pa., among whom there will be a young Negro delegate. This delegate will be of tremendous aid in helping to formulate the correct policy and approach to the thousands of young Negro workers in the vicinity and will be a real demonstration of the unity of interests between all workers. The fact that the Welsh Mine, where the recent strike occurred and the Glass Works of Bellaire, where the re-

LENIN ON MATERIALISM

one or another way defended and supported religion." Lenin shows how Marx and Engels always came out uncompromisingly as philosophic materialists and developed the materialist philosophy. Their doctrine is dialectics, it is the doctrine of evolution in its most complete, its deepest form, free from one-sidedness, the doctrine of the exact, altho relative ability to reflect the unceasing evolution in the material world. The test of the ability of human knowledge to give a reliable picture, the most correct picture possible of the material life is the fact that the human race is existing and going on. The recent discoveries of the natural sciences—radium, electrons, the divisibility of the elements—have to a high degree strengthened dia-

lectic materialism and disproved the "new" attempts of bourgeois philosophy to return to the old, decadent idealism.

"In deepening and developing philosophic materialism, Marx brought it to its conclusions. He applied the natural sciences to the knowledge of human society. The highest achievement of scientific thought was the historical materialism of Marx. In the place of chaos and haziness, which had up to this time ruled historical and political concepts, there came an admirably coherent and systematic, scientific theory." The social knowledge of man (that is, various philosophic, religious, political, and other doctrines and viewpoints) reflect the economic structure of society." "Marx's philosophy is philosophic materialism developed to its conclusion, and has given humanity, especially the working class, the great weapon of knowledge."

The two other parts of which Marxism consists are the economic theory developed in "Capital," and the doctrine of class struggle. Lenin has further explained these matters in an essay "Marx and Marxism" written for a legal encyclopedia in Russia. The parts which treat of Marxian philosophy and economy are still available, but the third part, which treated of Marxian revolutionary tactics, was deleted by the czarist censor and has been lost.

Lenin met mercilessly all attempts to revive idealism in some "modern" and "scientific" form as reactionary backslidings to super-

Rush Relief Funds to Passaic Strike

By Clarence Miller.

PASSAIC, N. J.—Four thousand workers from the Forstman and Huffman worsted spinning mills will soon join the nine thousand strikers of the different textile mills in Passaic, N. J. Many thousands of these are young workers between 14 and 20 years of age. The ten-hour day, the \$12 per week wages, the unsanitary conditions existing in the mills, the speed-up system and the right to organize are some of the problems that made these workers come out on strike. There are a few more mills that are still working in this vicinity, but they too will soon follow suit.

Many different plants in the city as the rubber works, chemical works, handkerchief factories, etc., where the wages of the workers as well as their conditions are similar to those in the textile mills are beginning to "shake."

Strikers Mercilessly Clubbed. Beating with extra heavy police clubs did not prevent the

workers from picketing and demonstrating in front of the plants located in Clifton, a town adjoining Passaic. Twenty men and women strikers, many of whom were young girls, almost children, were badly beaten and clubbed by the local police who must have been in the employ of the bosses. One woman at the time of writing this article is in a critical condition and it is questionable as to whether she will live. The day following the beating an ex-service man, a striker, came to the picket lines dressed in his A. E. F. outfit, including his steel trench helmet. His helmet was to protect him from the clubs of the American "cossacks." It must have been a part of the "democracy" that he fought for during the war.

Strikers Show Militant Spirit. In spite of the police persecutions, the starvation, and the methods that the bosses use to trick the workers back to work their morale is on the increase. The slow but constant and systematic spread of the strike movement has been an inspiration to the fighting workers. The Young Workers League of Passaic was also represented there. It is advisable that in all other cities conferences for this pur-

pose be called to arrange for the raising of funds for the strikers.

The daily picket lines consist often of several thousand strikers. The young workers with their youthful enthusiasm, and with their singing add the pep to the marches. The young workers are also in the forefront of the relief workers, and bring help to those who need it.

Relief Needed.

It is almost four weeks that some of the mills are out on strike. It is not possible for these underpaid workers to hold out much longer unless help comes in from some place. It is imperative that all the workers throughout the country get in back of these strikers. These strikers are fighting the battle against lowering the standard of living of all the workers in this country. If they lose it will mean a setback for the rest of the American workers.

Many local trade unions and other workers' organizations have attended a conference for the relief of the workers. The Young Workers League of Passaic was also represented there. It is advisable that in all other cities conferences for this pur-

pose be called to arrange for the raising of funds for the strikers.

Funds should be sent immediately to the Strikers' Relief Committee at 743 Maine Ave., Passaic, N. J.

Strikers Stand Fast

(Continued from page 1)

it, more wages and less hours; better working conditions. Colonel Johnson by his talk shows that he thinks that we are not able to judge what is good or bad for us.

But let the Johnson gang know we are going to stay out. Their hopes of starving us to death will not be realized. Relief is coming in fast. Already the Associated Silk Workers Union has donated \$1,000. A city organization donated \$500. Affairs and entertainments are being arranged for the benefit of the strikers. A tag day is being held. Money is coming pretty thick from the Passaic and New York organizations. More workers will join and are swelling our ranks. All indications are that we are going to win the strike.

ANTI-INDEPENDENCE BUNK PEDDLED IN FILIPINO SCHOOL DEBATE

By Student Correspondent
BLAIR STA., Pa.—One day last month debate was held in our school on the question: Should the Filipinos have their independence?

One of the debaters said: "We are spending millions of dollars for the Filipinos and do not get any profit from it." Then in trying to make another point he said: "If we give the Filipinos their independence, probably England, France or Italy would swoop down and capture the Philippine Islands and take away our trade."

With this latter point he admitted that the American imperialists are profiting by exploiting the workers and farmers of the Philippines.

In stating another point he said: "Anyway the best people of the Philippines, do not want independence." He did not however, state who these best people are. Very likely they were those capitalists most directly connected with the foreign exploiters. The great mass of the people on the Philippine Islands demand independence and will fight for it.

Of course the American capitalists do not want to free the Philippines. Because under their rotten system they make the natives of the islands work for a few cents a day and thus pile up immense profits for themselves.

The judges of this debate were the principal and two teachers. This shows that these teachers are governed by policies of the United States Steel Corporation and it is only by allying themselves with the workers in their struggle that they will be doing good work.

YOUNG UKRAINIAN WORKERS JOIN LEAGUE IN BODY

DETROIT, Mich.—The Young Ukrainian workers of Hamtramck have joined the Young Workers (Communist) League in a body a short time ago. Any comrade living in this part of Detroit is urged to attend the meetings and join the League. We meet every Sunday afternoon at 1:30 in the Grayling Hall, 2376 Grayling Ave.

in the year 1908, before materialism, but denying the ability of human consciousness to understand matter, he said, "Materialism and Empire-Criticism," after some comrades (Lunacharsky, Bogdanoff) during the bound movement of matter, our consciousness, which is the highest product of nature is able of conceiving this."
